Rock Salt Lamps

Rock Salt Lamps are handmade from crystal salt that is mined in the HIMALAYAS. Salt mine deposits lie at a depth of 1800 feet where they were formed millions of years ago by natural geological process. Each lamp is unique in shape and hand carved.

The environment we live in today has far more sources of positive ions than ever, creating an electrical imbalance in the air. Think a heating systems, air conditioning, exhaust fumes, TV radios, computers, transmitters, cigarette smoke. You get the picture. It's amazing we not worse off than we are! But this is one time when being naive is good. It's the negative ions that are so beneficial for our health and well-being. Negative ions are found on mountain tops, waterfalls, in the sea and in these salt crystal rock.

The Cheapest and simplest method of fighting against Electric smog is to air room regularly, particularly those in which a few people stay together for sometime, in which there are many electric machines or where cigarettes are smoked. You can use air ionizers but they are quite expensive.

The amazing rock salt crystal lamps are natural air ionizers. It helps in removing Electric Smog. They effectively boosts the number of negative ions in the room. The effect of air ionization by salt originator from physical and chemical properties of salt discovered many years ago.

The best thing about our product is that they look and feel fantastic

Health Benefits

Many individuals claim that the release of negative ions from a heated salt lamp boasts many health benefits.

*Increases
