

HIMALAYA Rock Salt Lamps

SHREE SAI INDUSTRIES

History of Himalaya Salt

300 millions years ago, an ancient ocean existed where the Himalaya mountains are today. When the ocean dried up, a massive mineral rich salt deposit was left behind, buried by the natural forces creating the mountain range. The rising mountains sealed off the pure salt crystals from all contamination from civilization's chemicals and pollutants.

The special salt enjoys time tested health properties. Over 360 ancient Ayurvedic medicine still in Use today Himalaya (Saindhav) salt as ingredient in the treatment of conditions like high blood pressure, obesity, diabetes and other medical problems.

Himalaya salt pink and white crystals sparkle like diamonds attesting to their natural purity. This totally natural salt contains over 74 trace minerals, including all those known to be essential for good health and vitality. Unlike most "food grade" salts, Himalaya salt is not processed with chemicals and contains no preservatives or additives.

These unique, sparkling crystals deliver the perfect salt condiment for gourmet cooking... a clean, pure taste that enhances the natural flavor of food and has none of the bitterness or processing aftertaste of typical commercial salt. The Himalayan salt Company's simple mining and packing methods carefully protect the natural purity of this product.

THE PROBLEM: Air Pollution at Home and Work (Positive Ions)

In even the cleanest home or office, the air contains microscopic particles such as dust, pollen, bacteria, pet dander and contaminants from house hold products, vehicles exhaust and Industrial pollutants. Many of these particles in the air we breathe every day can contribute to irritate the linings of our nose, sinus and lungs leading to congestion and respiratory difficulty. Most types of contaminating microscopic particles in our air have a positive charge. An overabundance of positive ions creates less oxygen that often gives rise to respiratory and allergic problems.

THE SOLUTION: Himalaya Salt Lamps (Negative Ions)

Himalaya Salt Lamps are produced from natural salt crystals. Himalaya Salt crystals absorb moisture from the atmosphere and build up a negative ion field. Himalaya Salt Lamps release negative ions into the atmosphere, removing positively charged dust, pollen and bacterial particles. Negative ions also balance level of serotonin, a body chemicals link with a mood and stress. This may be why Himalaya Salt Lamp frequently make one feel relaxed and energized with enhanced concentration, productivity and alertness.

BENEFITS OF ROCK SALT LAMP

Salt Lamps Cleanse and Deodorize the Air

Reduce Allergy and Asthma Symptoms

Eases Coughing

Increase Energy Levels

Naturalize Electromagnetic Radiation

Better Sleep

Improve Mood and Concentration

Treat Seasonal Effective Disorder

Reduce Static Electricity in the Air

NATURAL ROCK SALT LAMPS

RS. 300-500

CRAFTED ROCK SALT LAMPS

RS. 800-1500
